12D M7 MANAGER/CLIENT OFFICER
CSCS
TRAINED FIRE WARDEN
FIRST AIDER (3 DAY COURSE)
COUNTER BALANCE FORKLIFT TRAINED
LAND BASED MACHINERY CARD

KEY EXPERIENCE: I come from a Traffic Management background primarily, I've been doing traffic management now for around 6 years but have worked in various industries such as Arboriculture/ Mechanics and even removals. My time working on the roads has really helped me understand the need for trained and skilled operatives within the traffic management industry. Throughout my career I have witnessed various incidents and near misses due to unskilled employees that I feel could have been prevented by training the staff to a high standard as required by Lantra. It is for this reason amongst others that I have lead my career towards Teaching/Assessing. My attention to detail within traffic management has helped me a lot with regards to quality of work and making sure everything that goes out the road is to a very high standard. As an assessor I'm constantly looking for new ways to improve the quality of work that goes out. I'm a dedicated person who always strives for perfection in all aspects of my work, whether it is designing plans for an upcoming scheme or simply tidying up, there will always be room for improvement in my eyes. I have developed natural leadership skills, helping me to train others and maintain a very high standard of work. I strongly believe in maintaining a safe working environment for everyone and working closely with our health and safety representative to do so accordingly.

Career History

2015 to 2016

Stores Manager and 12D Assessor – for H.W.Martin

I currently run a small team running the stores for the depot at South Brent. I am also a qualified 12D Assessor for H.W.Martin. Active Monitoring has also become a major part of my job roll ensuring the staff is working to a high standard. I am also creating Traffic Management drawings for works from 12D Rural and Urban Road to 12A High Speed Dual Carriageways and motorways.

2011 to 2015

Stores Manager and Traffic Management Operative- For Westcountry Road Management Ltd.

In this role I was responsible for the upkeep of the depot. This entailed ordering of new equipment, making temporary road signs using Graphtec software and general maintenance of the depot. I would also be required to set up multiple other jobs as and when required.

1994 to 1996

General Operative -For K J Thulborn Ltd.

My role in this position was to carry out all manner of contract work, for example tree work, grass cutting, Traffic Management and Fencing. Amongst other things

I was responsible for a small team of people ensuring all works were carried out to a high standard.
